

HFH Hose ID Chips

With the new HFH Hose ID Chips, you can easily access all information (such as manufacturer, hose type, operating pressure, serial number, fittings, last and next inspection) at any time, from anywhere, and even after many hours of intensive use, using a free app on your smartphone.

We do not rely on stickers that quickly wear out during use, but rather on stainless steel rings with integrated chips, designed to withstand long-term use.
